

SENSORY KITS

The Wilder Institute/Calgary Zoo offers inclusive, accessible tools for students/children with varying needs and abilities. We have sensory kits in each classroom, complete with noise-cancelling ear muffs, assorted fidget tools, vestibular wedges and seats, weighted stuffed animals or lap pads, and communication boards. We also offer assistive technology with applications for users with communication needs or who are deaf or hard-of-hearing, upon request. If your students/children would benefit from one of these accessibility tools, please let us know in the comments section when you register in a program.
